

The solution for Document Management Automation

Automate document management by improving communication to your ERPs and your business affiliates

Automate processes with Compleo Suite

Compleo Supervisor performs predetermined tasks when particular conditions are met. End users can create rules to automate the storage, formatting, printing, PDF conversion and email sending for any documents.

Automatically process email attachments as an input

incoming email supervision allows Compleo Suite users to process documents from a specific application, or email attachment coming from an outside resource (customers, suppliers...). Compleo Supervisor streamlines communication between your company and your business affiliates by giving users the ability to process email attachments seamlessly.

Reduce paper usage with automated document management

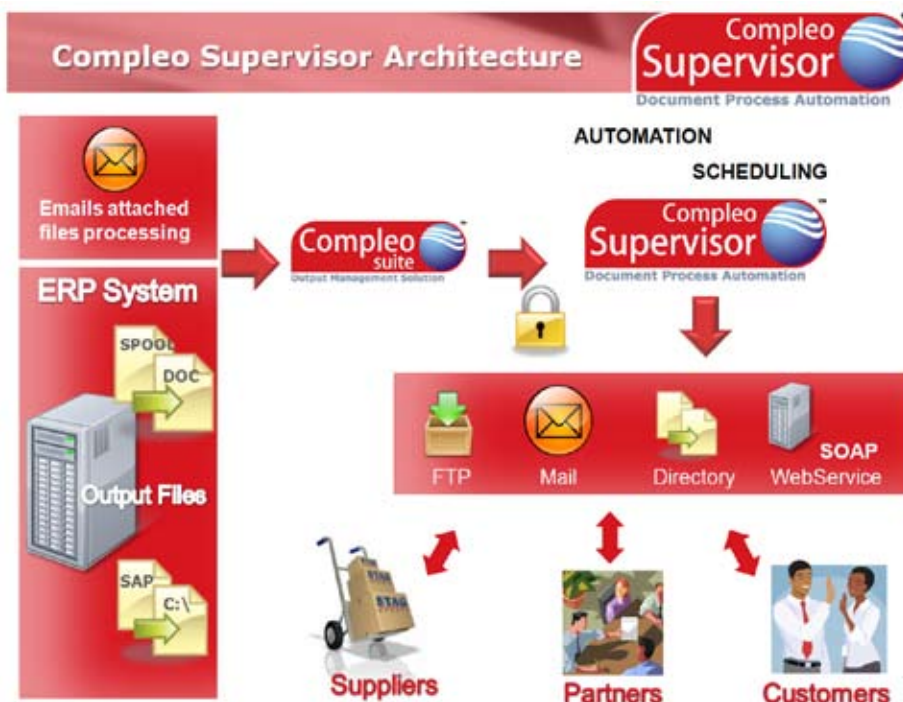

Compleo Supervisor allows your company to go paperless by creating electronic documents from your spool files. By automating file distribution from the printing queues, end users are able to reduce printing and mailing costs by leveraging electronic distribution.

Save time managing your resources with Compleo Supervisor

With parallel processing a user can process small files simultaneously with larger, or high priority files. This allows business activity to keep running at full capacity without experiencing any performance lags. The advanced management of printers network allows users to dynamically manage resources (backup, load balancing ...) for all printers and to manage jobs without changing printers.

Automation Benefits

- Complete automation saves time and improves accuracy
- Documents are professionally formatted and more timely
- Development processes improved
- Control and security of document processes are maximized
- Printing and paper usage are minimized or eliminated
- Company assets are valued internally and with partners

System Requirements

Hardware Configuration

Processor	Min : 500 MHz, recommended : >=2.0 Ghz
Memory Configuration	Min. 512 Mo, recommended >=1Gb
Hard Disk	Min : 150 Mo*, > recommended >=30Gb*

Software Configuration

Operating System	Windows 2000/XP/2003/VISTA/7
iSeries Operating System	OS/400 V3R2M0 or above OS/400 V3R7M0 or above
iSeries Connexion type	TCP/IP (local or distant connexion)
SAP R/3 Operating System	SAP Enterprise 4.7 or above
Known file formats	Compleo Suite 4 allows to work with following file types: iSeries: SCS, IPDS et AFPDS SAP: LIST et OTF PC: ASCII, EBCDIC, CSV, PDF et XML
Other tools	Microsoft Office 2000/XP/2003/2007 Acrobat Reader 5 or above Internet Explorer 6 or above
Sender options by e-mail	MS Outlook 2000/XP/2003/2007 connected at Exchange Server 5.0/5.5/2000/2003 Lotus Note 6/7/8 connected at Domino 6/7/8
Sender options by fax	Microsoft Shared Fax Driver Notice: No sender journal under Win2000

Compleo Suite 4 also works with several other tools and e-mailing softwares.

Symtrax

Symtrax is a worldwide organization which produces and distributes multiplatform reporting and output management software. With user friendliness at the forefront, Symtrax software will help create professional reports for better analysis and effective decision making.

Compleo Suite

A complete Output Management solution designed to manage, convert and distribute output files from any system (system i, system z, unix, oracle, windows and ERPs like SAP, JDE and more), all from a Windows-based PC.

The Compleo suite also offers powerful modules that automate electronic form creation and delivery plus fully-featured archiving capabilities.
