

**Compleo for SAP 4.10 adds a BC-XOM Connector**  
 Now easily Route, Print and Deliver documents in all popular Formats from within SAP

**Los Angeles; Boston; London; Nîmes; Mumbai - March 1st, 2011**

Symtrax, an international software company and SAP Partner today announced the release of a new SAP certified Output Management Solution to manage document routing, printing and delivery for SAP Systems: Compleo for SAP 4.10.

The SAP R/3 printing guide acknowledges that enterprises face ongoing changes to their business processes so it is advantageous if their document delivery systems are flexible and adaptive. It recommends implementing an External Output Management System, based on the SAP BC-XOM protocol, for optimal Enterprise document delivery support.

Featuring a BC-XOM Connector, Compleo for SAP 4.10 is the right choice.

The right choice for IT because it solves the difficulties of SAP printer configuration and maintenance with all processing done outside SAP; reducing dependency and costs associated with dedicated printers for SAP and allowing upgrades and changes to be handled without recreating printing configurations. It also adds useful features such as printer back up and load balancing rules, and it does not require any installation on the SAP System.

Additionally, Compleo for SAP 4.10 allows sharing printer resources via a centralized printing system for multiple SAP Systems. Routing tables can be created that inherit SAP user group definitions adding easy to configure flexibility.

Compleo is also the right choice for end-users because they benefit from enhanced communication between the SAP System and Compleo’s user-friendly interface. Compleo for SAP 4.10 provides them with instant “sent to printer” status for their output requests. End users will also appreciate Compleo’s ability to Re-format reports making them easy to understand and even converting them to Excel or other formats as needed while delivering them as email, faxes or via web services.
