Adecco, ArcelorMittal Construction, Crédit Immobilier de France, DHL Fashion SAS, Dyneff, Faurecia, Fleurance Nature, Foncia, Groupe Arcade, Good Year Nederland, Hamburg Port Authority, Hinduja Bank, Honda Motor Europe, Husqvarna Belgium, Hutchinson, Konica Minolta, Kuhn, Volkswagen Stiftung, Volvo...

Testimonial

"Very efficient, StarQuery gives us standardized and beautiful reporting, it's really more flexible than our ERP system."

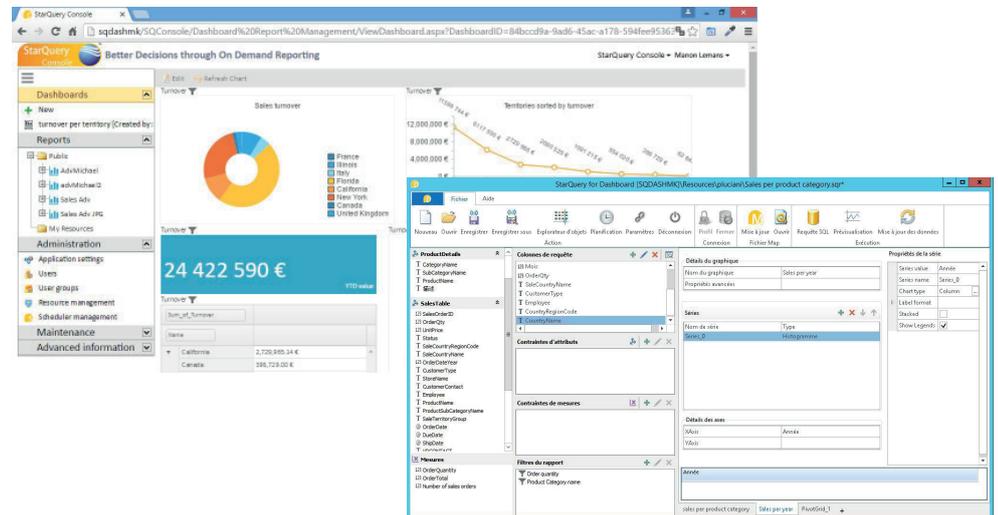

Colin Burns,
Sales Director,
Groupe HK

StarQuery for
Dashboard

Create Your Online Dashboard

With StarQuery for Dashboard, management can easily create dashboards that visually communicate Key Performance Indicators (KPI's) in graphs and tables. Internal communication is simplified as teams are able to access queries and data from a centralized web interface. Through StarQuery for Dashboard, users share dataset views that are always up-to-date.

Features and Benefits

Create and easily configure graphs

Personalize and highlight data using charts and pivot tables.

Align business departments with corporate strategy to achieve functional synergies

Dashboards can be created for each department or shared company-wide. Easy online access allows for clear performance objectives and facilitates effective project management.

Internally Communicate KPIs

With our web interface, access can be restricted to authorized users, keeping your data secure for your team. No matter where they are, users can securely view dashboards for informed decision making.

Combine Multiple Data Sources

Establish a single source of truth and stop the never-ending search for data in large, messy databases. Build dashboards for efficient data analysis by combining data from multiple databases.

Example of use

- ▶ Overview of sales against objectives
- ▶ Quality indicators: number of customer complaints, resolution rate, percentage of defective items ...
- ▶ Inventory levels by warehouse, product family, subfamily
- ▶ Reaching margin or volume objectives
- ▶ Evolution of turnover: by zone, country, product ...
