compleo
suite
A fully connected document solution

## How can Compleo Suite help you?

Compleo Suite's modules help facilitate and manage ERP-generated documents. Create reports, make design changes, and share the results through a unique link instead of an attachment. With multilingual text translation, versioning views, and network integration, your company can stay competitive while effortlessly reaching out to clients and partners. Put your official stamp on everything from invoices to proposals and take control of your document distribution process.

## Innovative Document Solutions

- ► Deliver highly personalized customer communications directly from your CRM or ERP
- ► Track document distribution and gain insight from document activities
- ► Share business documents via on-premise or cloud repository data
- ► Use DocuSign to create digital signatures for PDFs
- ► Integrate with third party solutions such as AWS, Sharepoint, and Dropbox
- ► Save time and avoid unnecessary duplication

## Stephen Scott, Your Back Office LLC

*Like most businesses our needs do change over time. We strive to become leaner and yet provide a higher level of service. Compleo has helped by allowing us to reduce our dependence on printed reports and postage (becoming leaner) and by delivering invoices and delivery tickets more quickly (service).*

# Our Compleo Suite Modules

### Recreate the Look of Your Documents

**compleo Layout** (L) — Personalize documents with graphics and logos
